Discover Free Online Learning Opportunities!

LAPTOP

JSI, People that Deliver, and the Reproductive Health Supplies Coalition created LAPTOP, a comprehensive course-finder focusing on supply chain management. Click here to search for a training course that fits your needs and professional development goals.

E-Learning Resources

i+solutions offers short stand-alone courses (introduction to HIV and AIDS and the supply chain management of ARVs; quantification of medicines and health products; and introduction to antimalarials). Participants who complete all lessons, quizzes, and exercises receive an e-badge. Questions and in-depth issues can be further explored through a discussion

About

Why IAPHL?

Public health logisticians have a critical but often undervalued role in providing life-saving health services. Especially in developing countries, supply chain management is often not recognized as a profession that requires specialized training. The International Association of Public Health Logisticians was established in 2007 to promote the professionalization of the field of public health logistics through education and information sharing. The association supports logisticians worldwide by providing a forum for members to network, exchange ideas, and improve skills. Members come from nearly 140 countries, a variety of professional backgrounds, and represent all levels of the supply chain.

Vision

A world in which all people have access to life-saving health products, delivered by sustainable supply chains that are managed by competent, empowered, and connected professionals.

Webinar on Vietnam's Outsourcing Model for Cold Chain Equipment Maintenance

Vietnam's National Expanded Programme on Immunisation (NEPI) has, since 2010, worked with the Luxembourg Agency for Development Cooperation to strengthen the nation-wide cold chain equipment maintenance system, using an outsourced services model. Simultaneously, a nationwide internal cold chain equipment management program was established and continues to be strengthened.

On January 8th 2015, Gavi and IAPHL hosted a webinar at which the Vietnam team shared its experience with this method of equipment maintenance management. We invite you to join the conversation and ask questions on Vietnam's outsourcing model as well as share your own experiences related to cold chain maintenance strengthening on the IAPHL listserv. Listen to a recording of the webex
